Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 75-78 are rejected under 35 U.S.C. 102(b,e) as being anticipated by Daigle (US5127409). Daigle teaches an annular ultrasound array probe 161-163, a personal computer platform (col. 10 lines 58 - 62) for which a central processing unit is inherent in the definition of a personal computer effecting operational software as described in cols. 11 - 12, the personal

Art Unit: 3737

computer including a beamformer (col. 11 lines 47 - 58 versus claim 80), and a signal processing software (col. 12 lines 10 - 20) for performing multi-dimensional Doppler processing, and display processing software and display therefore, (col. 10 line 62 as expanded upon thereafter pertains to executable signal processing and display software vis-a-vis claim 77). Memory is present (claim 76) for example the RF memory 211-213 is characterizable as part of the PC platform per col. 10 line 63 - col. 11 line 5 and constitutes a digital buffer memory for effecting a delay-and-forward function (claim 78); similarly col. 12 lines 28-31 pertain to PC storage elements. Scan conversion may be wholly software or a hardware-software mix per col. 12 lines 38 - 51 (claim 79).

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action since claims to the new invention were presented with the amendment. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however,

Art Unit: 3737

will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
